Open Source Programme

The NHS England Open Source Programme is about increasing **the range** of digital solutions available for the care community.

We're Open Health Care UK

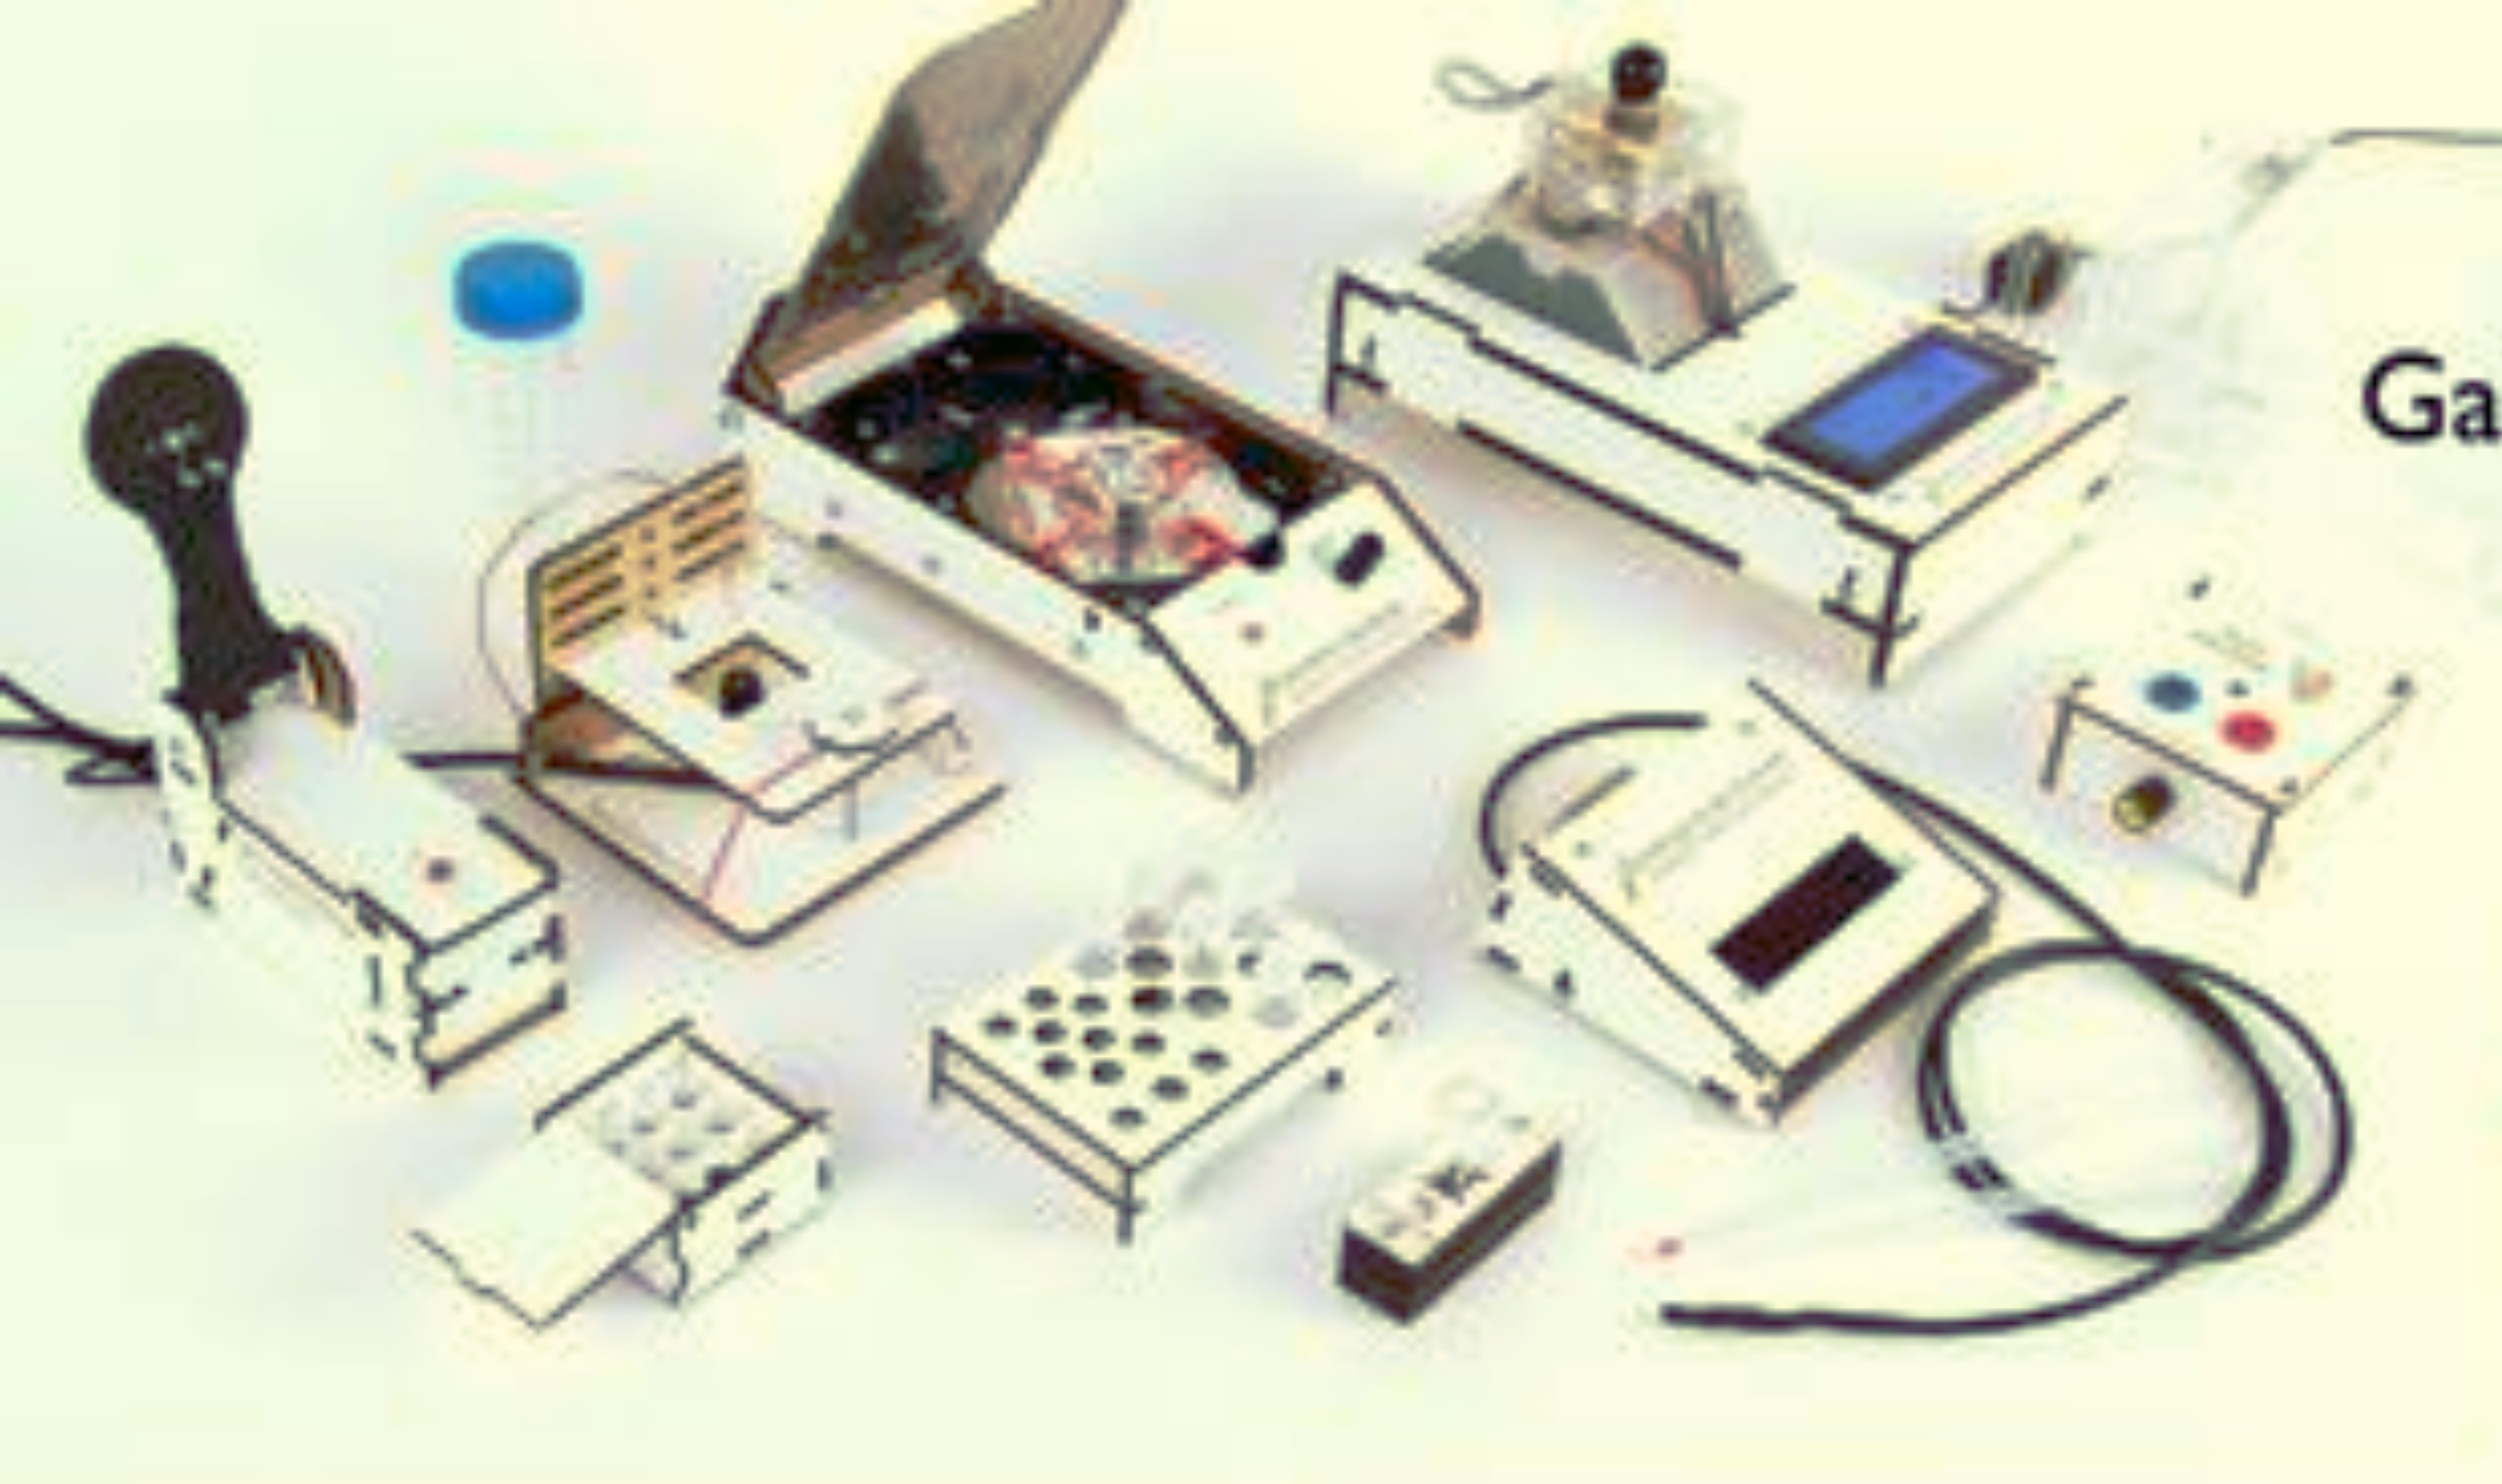

50 Successful Open Source Projects That Are Changing Medicine

Open source healthcare is forging forward quickly on the Internet. But, fast developments often produce many failures. But, many medicinal open source projects have survived and prospered. This course discusses some

2015.

So, we're health by making user-focused digital health services for healthcare professionals and patients. We work closely with our customers and use modern agile and Open software development and management methods. We charge for development and support. We don't charge for a licence.
