INITIATING ENQUIRY

If you really want your child to be **creative, intelligent & sensitive** you have no choice but to be **a learner**. A learner's first quality is **to accept that** one doesn't know, **to stop depending** on books and experts, and **to start observing**. If you sensitively engage with children, **they will teach you** what learning is all about. Children are **learning all the time**.

The most important fall out of the change in your approach is that you will influence the children to be learners. Unfortunately even if they are born with innate ability to learn , seeing you depending on experts children also imbibe your behaviour.

3. Why children **DRAW**

INITIATING ENQUIRY

1

Why children

PLAY & MAKE TOYS

Understanding the real world

Children create understanding of the real world by recreating their experiences- by **re-enacting** events and **re-creating** objects. Explore what children do.

INITIATING ENQUIRY

2

How children learn

LANGUAGE

Articulating experience

Children are learning to articulate their experiences and they are using whatever means are available to **communicate** with adults. Learn how children connect the world with sounds

3

Why children

DRAW

Connecting 3-D and 2-D

Drawing, if done without any interference is a **cognitive activity** that children do to understand the real world in two-dimensional space
