

Teaching Climate Change

An online workshop for educators providing pedagogy and resources for teaching climate change in your discipline

Saturday, September 3rd | 3.00 – 8.00 pm | Online

The climate crisis is an existential one and demands a re-imagining of education. We need to create a generation of students who are climate literate. This requires making climate change central to all knowledge and ideas that students learn in the classroom for which teachers need to be trained for teaching climate concepts. This workshop organized by Teachers against the Climate Crisis (TACC) will provide educators pedagogical tools and resources for discussing climate change in their classroom irrespective of discipline.

What will you get from attending this workshop?

- Understand the deep origins of the climate crisis
- Explore the links of the climate crisis to your discipline
- Acquire pedagogical tools to discuss the climate crisis in the classroom

Schedule

Session 1: 3.00 - 4.00 pm

Climate Change in India: How will India be affected and how should we respond? | Speaker: Nagraj Adve
