## Mapping for Transition

Social movements, NGOs, research institutions, media, we are committed to the "Great Transition" (GT) movement. How to increase the understanding our specific place and role? How to build new alliances and collaborations between us?

In the continuing process "Towards a World Citizens Movement" (DEEEP/Concord 2002-2015), this mapping must be both movement and action oriented. Discriminated by topics, campaigns or specific measures, from local to global scales, our common database must be managed as a collaborative tool (peer to peer).
