

# nutrient rich compost

the land gardeners  
invite you to  
How to Make Nutrient Rich Compost

with  
Marc Verhofstede

Tuesday 29th September  
10am - 3pm  
at  
Wardington Manor  
Banbury OX17 1SW  
[www.thelandgardeners.com](http://www.thelandgardeners.com)

Marc Verhofstede from Belgium will be taking the course.  
Marc has spent the last 20 years researching the best way to compost, en-  
rich the soil and grow nutrient dense food.  
You will acquire a good understanding of the transformation process from  
raw organic matter to  
microbial active sustainable humus in 10 - 12 weeks

Cost £80  
r.s.v.p [studio@thelandgardeners.com](mailto:studio@thelandgardeners.com)

Marc Verhofstade ([www.bio-compost.be](http://www.bio-compost.be)) is an organic farmer and a compost expert. He has spent 20 years researching and testing compost methods in Europe and America.

He advises both gardeners, horticulturalists and farmers on techniques to feed and improve the soil. He also consults on animal health issues in Belgium.

## The day at Wardington will include:

An introduction to soil-life  
 What is needed for a healthy soil?  
 Basics for high quality composting  
 Practical compost-demonstration : setting up and follow up of a compost pile  
 How to measure compost quality?  
 Compost, production, application and effects  
 How to apply composting principals in gardens & on a larger scale  
 Questions & answers

Opportunity to buy composting equipment and microbial inoculations

Morning tea  
 and a delicious organic lunch

Bring a sample of your soil with you
