

Learn how to make and use **Terra Preta**

The use of TerraPreta (Black Earth) can improve soil health, fertility and water retention, making growing vegetables in home gardening and market gardening easier.

In addition, it can reduce CO2 emissions and help sequester carbon

A Workshop with Rainer Sagawe, a Terra Preta Expert from Hameln, Germany

Saturday, 24. September 2016 9.30 am till 5.30pm

**At Plaw Hatch Farm
Contribution £50**

**For bookings and more information contact Dorothea Leber
growingandhealing@live.com or Nir Halfon halfonwood@gmail.com**

Program:

- Introduction: what is Terra Preta
- Role of Biochar for soil life and Terra Preta
- Making Biochar in an Earth funnel
- Cooking on a pyrolysis cooker and producing Biochar
- Making Terra Preta black earth
- Looking after Terra Preta, feeding with mulch and „smoothies“.

Garden with your hands in a new way
